HOME MADE ARAK

Rp. 37.500,-

We take great pride in fermenting and distilling our own Arak. The outmost of care is taken during distillation to separate the ethanol from the methanol and as such when drank with care and in moderation you should be able to enjoy the terrific flavors of this often miss understood distillate. The base product is palm wine that is first fermented for three days before being distilled. Our home build still is based on the principal used in many homes mainly in the eastern part of Bali. We avoided the use of plain Bamboo and instead using food save stainless steal that gives us also the possibility to carefully control the temperature that is the key to a pure taste. If drank on its own then we serve this unique palm whiskey in a brandy shaker that will give you the pleasure of enjoying the strong wild flavors firsts.
